Product Name :

Hazard Warning Tape: Irritant

Product Code :

SLE/CH/243

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Hazard Warning Tape: Irritant (Product Code: SLE/CH/243) is a self-adhesive vinyl marking tape printed with the irritant hazard pictogram. It is used to flag shelves, cupboards, bench zones and containers where substances that can irritate the skin, eyes or airways are stored or handled, so that students and staff notice the hazard before they reach for anything. Chemistry teachers, lab technicians and stores staff in schools, colleges and institutional labs use it as a quick, visible warning. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, which serves institutions looking for a single lab consumables supplier in India alongside their apparatus orders.

Specifications

Parameter	Detail
Type	Self-adhesive vinyl hazard warning tape
Hazard symbol	Irritant pictogram
Tape colour	White, printed with the pictogram
Width	25 mm
Roll length	66 m
Print pattern	Pictogram repeated every 75 mm, with a blank area between symbols
Supplied as	Roll

Typical Use

In a school or college preparation room the tape is typically run along the front edge of reagent shelves, around the doors of storage cupboards and across the lids of waste or stock containers that hold irritant materials. Because the symbol repeats every 75 mm, even a short strip cut from the roll carries at least one complete pictogram, which makes it practical for small bottles and trays as well as long shelf fronts. The blank space between symbols can take a short handwritten note, such as a shelf reference, where your lab procedure calls for one.

When planning a school lab setup in India, many laboratories colour-code storage by hazard type, and this irritant tape fits that approach next to the corrosive and flammable versions. For good adhesion, apply it to a clean, dry and grease-free surface and press it down firmly along its length; replace any strip that has faded or started to lift. The tape is a visual reminder only — it supplements, and never replaces, the original container labels and safety data sheets supplied with each chemical.

Supplier

This tape comes from Jain Scientific Equipments Private Limited, the Ambala, Haryana company that trades under the ScienceLab name. Safety consumables such as marking tapes are supplied together with the laboratory apparatus the company makes, so a lab can order its warning mate
