Product Name :

Human Pelvis Structural Model With 5 Pcs Lumbar Vertebrae

Product Code :

SLE/BL/75

Description :

Human Pelvis Structural Model With 5 Pcs Lumbar Vertebrae (Product Code: SLE/BL/75) is an anatomical bone model of the lower spine joined to the pelvis, used to teach the lumbosacral region as one functional unit in anatomy, physiotherapy and sports science courses. Its five life-size lumbar vertebrae are shown with normal intervertebral discs and the spinal cord, sitting on the pelvis as they do in the body. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Lumbar vertebrae	5 pieces, life size
Intervertebral discs	Normal (healthy) discs shown
Neural structure	Spinal cord
Pelvis	Included, joined to the lumbar spine
Product code	SLE/BL/75
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Pelvis and Lumbar Vertebrae Model Used For?

Many back and hip complaints involve the junction between the lumbar spine and the pelvis, and this model lets a tutor show that connection directly. Students can follow the curve of the lower back into the pelvis, see how the discs separate each vertebra, and understand why tilting the pelvis changes the posture of the whole lower spine. It is especially helpful when teaching core-stability exercises, lifting technique and ergonomic sitting.

Colleges setting up biology lab equipment in India for human anatomy often choose a combined model like this instead of separate spine and pelvis pieces, because it keeps the structures in their correct relationship. Handle it by the pelvis rather than the vertebrae, and store it upright on a stable surface.

OEM Manufacturer

The model is made by Jain Scientific Equipments Private Limited — the company behind the ScienceLab name — as OEM (original equipment manufacturer) at its own licensed factory at Saha, Ambala, Haryana, India. Anatomy departments, physiotherapy colleges, dealers and importers order it straight from the factory rather than through a trader.

Questions about the pelvis type, a stand or a matching spine model are answered by the manufacturer itself, and repeat orders for further labs come from the same source. See the comp
