Description :

Tape (Product Code: SCL109/1.3) is a metal measuring tape for taking lengths, widths and spans from one point to another during practical work. Teachers and students use it to mark out distances for motion experiments, measure benches and apparatus, and record outdoor dimensions in geography and environmental projects. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its school laboratory equipment range for institutions in India and international markets.

Key Details

Parameter	Detail
Type	Measuring tape
Material	Metal
Starting point	End-clip placed at the location you want to measure from
Method of use	Extended point to point across the distance being measured
Handling	Relatively safe and easy to use for students
Suitable for	School laboratories, classrooms and outdoor field measurement

Typical Use

In a physics period the tape is laid along the floor or bench to set a known distance for a trolley run, a falling-object drop or a sound-echo measurement, so students can pair a measured length with a timed reading. It is equally handy for sizing up a room before a lab layout change, checking the spacing of stands, or marking plots in the school garden for an ecology survey. As mechanics lab equipment in India goes, a simple tape remains one of the most frequently borrowed items in the prep room.

For a clean reading, set the end-clip exactly on the starting mark, run the tape straight without twists or sag, and read the value squarely from above. On a long span one student can anchor the clip against a fixed object while another reads the far end. Tape measures commonly offer a clip for hooking onto a fixed edge, a brake on steel-blade types that locks the blade, or a side crank on longer cloth tapes; ask us which of these features the current version of this item carries.

Manufacturer

This tape is manufactured by **Jain Scientific Equipments Private Limited**, a company that sells under the ScienceLab name from Ambala, Haryana, India. Schools, colleges and distributors can read about the company's background and product lines on our company profile page.
