Description :

Lamela (Product Code: SCL135/1.15) is a square microscope cover slip, 20 mm x 20 mm, made of clear borosilicate glass. Laid over a specimen on a slide, it keeps solid material pressed flatand shapes a liquid sample into a thin layer of even thickness, so the whole field comes intofocus and the objective lens stays clean. Cover slips are essential equipment in any lab that usesa microscope, and this one is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for institutions looking for a lab consumables supplier in India.

Specifications

Parameter	Detail
Type	Microscope slide cover slip
Size	20 mm x 20 mm
Material	Borosilicate glass
Shape	Square
Colour	Clear
Used in	Laboratory microscopy

Typical Use

To make a wet mount without trapped air, place the specimen and a drop of liquid on the slide, touch one edge of the cover slip to the drop at an angle, and lower it slowly with a needle so the liquid spreads out ahead of it. The 20 x 20 mm square covers a typical onion peel, leaf section or drop of culture comfortably on a standard slide. Stains can be drawn under the cover slip from one side with a strip of filter paper at the other, which is a handy technique for iodine or methylene blue staining. Schools stocking borosilicate laboratory glassware in India can add these cover slips to the same order as their slides.

Cover slips are thin and break easily, so pick them up by the edges or with fine forceps and keep spares in their pack until needed. Dispose of broken pieces in a glass bin rather than general waste.

Supplier

Lamela cover slips are supplied by **Jain Scientific Equipments Private Limited**, which operates as ScienceLab from Ambala in Haryana and provides microscopy consumables and apparatus to educational labs. Our company profile explains more about the business.

Related Laboratory Equipment

Items used with cover slips when preparing and viewing mounts:

- Lama — 25.4 x 76.2 mm ground-edge glass slides to carry the specimen
- Microscope Slide Cover Forceps — for picking up thin cover slips safely
