Description :

Series of Microscopic Preparation for Micro Organism (Product Code: SCL147/1.18) is a set of ten coloured prepared microscope slides that lets students observe bacteria, protozoa and simple algae under a compound microscope instead of only reading about them. Biology teachers use it for micro-organism lessons in school and college practicals, and every glass slide carries both the scientific name and the Albanian name of its specimen. The series is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Series of prepared microscope slides of micro-organisms
Number of preparations	10
Slide material	Glass
Slide shape	Rectangular
Preparations	Coloured
Labelling	Scientific name and Albanian language
Programme reference	Prepared according to the 7th and 9th biology programmes
Preparations named in the series	Bacteria of different forms; Amoeba; Euglena; Paramecium; Chlamydomonas; Protozoa; Staphylococcus; Spirogyra

Typical Use

In a practical session, place the slides at a bench of compound microscopes and ask students to sketch what they see, locating each specimen at low power before moving to higher magnification for detail. The bacteria slide is ideal for comparing cell shapes, while Amoeba, Euglena and Paramecium give a clear contrast between the different ways single-celled organisms move and feed. Chlamydomonas and Spirogyra introduce green, photosynthetic micro-organisms, so one set covers several syllabus points in a single period.

Because the preparations are permanent, they are ready whenever a lesson needs them and suit schools that prefer not to culture live organisms. For teachers assembling a microscope slides set for school practicals, this series sits naturally beside its human histology and plant construction companions listed below. Hold the slides by their edges, clean the glass only with lens tissue, and return each slide to storage at the end of the class.

Supplier

This slide series is supplied by Jain Scientific Equipments Private Limited, the Ambala, Haryana company that trades under the ScienceLab name and equips school, college and university laboratories in India and international markets. Slide sets can be ordered together with the company's own teaching models and apparatus, so a single enquiry can cover an entire biology practi
