Description :

Series of Teaching Model in Relief for Biology 7.B32 (Product Code: SCL189/1.28) is a set of ten raised-relief panels that takes students through the animal kingdom, from worms and shellfish among the invertebrates to fish, reptiles, birds and mammals among the vertebrates. The one-page panels measure 50 x 70 cm and are made of plastic finished in non-toxic colours. Made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, an OEM manufacturer and laboratory instruments supplier in India, the series supports zoology and animal classification lessons.

Specifications

Parameter	Detail
Number of panels	10
Panel size	50 x 70 cm
Format	One-page, in relief
Material	Plastic with non-toxic colours
Invertebrate topics listed	Worms; shellfish; spiny-skinned animals (echinoderms); invertebrates
Vertebrate topics listed	Fish; reptiles; birds; mammals

Typical Use

The series fits a unit on classification. Put up the invertebrate panels first and ask students to note the body features that define each group, then move to the vertebrate panels and compare body coverings, limbs and ways of breathing across fish, reptiles, birds and mammals. Because the outlines are raised, students can trace structures by touch, which makes the comparisons more memorable than a printed poster.

Teachers also run the panels as stations in a carousel activity: groups rotate from panel to panel, record the characteristics of each animal group and finally build a class classification chart for the biology room wall. Wipe the panels with a damp cloth and keep them away from direct heat so the colours and relief stay in good condition.

Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, manufactures this zoology relief series in Ambala, Haryana, within a wider catalogue of biology models, charts and laboratory apparatus. Schools and institutions in India and international markets can order it on its own or together with other teaching aids. The ScienceLab company profile has more background.
