Description :

Herbarium Series for the Vegetation of Albania (Product Code: SCL205/1.32) is a collection of 15 plant specimens drawn from the vegetation of Albania, covering plants without seeds as well as plants whose seeds are completely covered and plants with naked seeds. Each specimen is identified with its province, location and name in both Albanian and scientific language, giving botany classes a ready reference for plant classification. The series is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Number of specimens	15
Plant groups	Plants without seeds; plants with completely covered seeds; plants with naked seeds
Woody and shrubby specimens	Presented with leaves and multiplication (reproductive) bodies
Herbaceous specimens	Presented with leaves, flowers and roots
Specimen data	Province, location, Albanian name and scientific name
Coverage as listed	Marsha; Shoqova; Mersina; Laulija; Ahu; Geshtenja; Qarri; Lisi; fir; Komba; Fieri; algae and lichen; lime

Typical Use

A herbarium lets students study genuine plant material at any time of year. In a classification lesson, sort the specimens into the groups represented – plants without seeds, naked-seed plants and plants whose seeds are enclosed – and ask learners to justify each placement from what they can see. Woody specimens with their reproductive bodies and herbaceous specimens with flowers and roots offer plenty to compare, while the algae and lichen material widens the discussion to simpler organisms.

Because each specimen records its province and location, the series also supports lessons on local flora and habitats, and on how botanists document a collection. Handle the specimens gently, keep them dry and protected from insects, and use a hand lens rather than touching delicate parts. For botany lab equipment lists, the herbarium complements flower models and plant tissue slides.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, supplies this herbarium series alongside the biology models, charts and apparatus it manufactures. Institutions in India and international markets can include specimen collections like this in one consolidated order. Read about the company on the ScienceLab profile.
