Description :

Tape Meter (Product Code: SCL263/032) is a 2 m soft-grip measuring tape used to measure lengths, heights and distances in school science, maths and field-study activities. Teachers and students use it wherever a ruler is too short, and it has a metallic housing with a yellow finish that stands out on a crowded bench. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as a routine item on any school lab instruments list.

Specifications

Parameter	Detail
Type	Soft-grip measuring tape
Length	2 m
Housing	Metallic
Colour	Yellow
Product code	SCL263/032
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the 2 m Measuring Tape Used For?

In the laboratory, the tape measures pendulum lengths, ramp and track distances for motion experiments, and the height of plants in growth investigations. In maths and physical education it records student heights, jump distances and the perimeter of classroom objects, while field trips use it to mark out small survey plots.

For reliable results, keep the tape straight and taut, start exactly at the zero mark, and read the scale at eye level. Guide the tape back into the housing rather than letting it run freely, and wipe it dry after outdoor use so the metallic housing and markings stay in good condition.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Tape Meter from Ambala, Haryana, India to schools, colleges, dealers and project buyers in India and international markets. We source it for customers who want their measuring tools on the same quotation as their other laboratory items, which simplifies ordering for new or upgraded labs.

Related Laboratory Equipment

Other measuring tools often ordered alongside the Tape Meter:

- Tape, Measure, 5 m, Retractable — a longer tape for sports fields and corridors.
- Fiberglass Tape Measure — a flexible tape for curved surfaces and outdoor work.
- Meter Scale — a rigid scale for straight-line bench measurements.
