Description :

Glass Bottle for Liquids 1 (Product Code: SCL318/059) is a 60 ml coloured glass reagent bottle with a narrow mouth and a coloured closure, used to keep liquid reagents in school and college laboratories. Coloured glass is a common choice for solutions that should not stand in bright light, and the narrow neck allows careful pouring. This reagent bottle is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Product type	Liquid reagent glass bottle
Material	Glass
Capacity	60 ml
Colour	Coloured
Neck	Narrow mouth
Closure	Coloured closure
Product code	SCL318/059
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Coloured Glass Bottle for Liquids Used For?

Teachers use a small coloured reagent bottle for the stock of a solution that is prepared in modest amounts and topped up often: iodine solution for food tests, a biological stain for slide work, or an indicator kept in reserve for the dropper bottles on each bench. At 60 ml, it holds a ready supply without tying up a large volume of reagent, which suits schools setting up chemistry lab glassware in India on a practical budget.

Store the bottle in a closed cupboard and write the contents and preparation date on the label, because the tinted glass makes the liquid harder to identify by eye. Close it promptly after pouring so that volatile solutions do not weaken over time.

OEM Manufacturer

ScienceLab is the OEM for Glass Bottle for Liquids 1. The company, legally Jain Scientific Equipments Private Limited, makes the bottle at its own licensed factory in Saha, Ambala, Haryana, and supplies it straight from the factory to schools, colleges, research laboratories, dealers and importers. When a laboratory wants more bottles to match an earlier batch, it can come back directly to the maker; just ask us. More about the company is on our profile page.
