Description :

Dishwashing Brush (Product Code: SCL338/069) is a laboratory cleaning brush used to scrub beakers, dishes, wide-mouth bottles and other glassware in school, college and research laboratories. It is 200 mm long with a 35 mm diameter and a chemical-resistant build, so lab assistants can clear residues left by common reagents after each practical. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its range as a lab consumables supplier.

Specifications

Parameter	Detail
Purpose	Washing laboratory dishes and glassware
Brush length	200 mm
Diameter	35 mm
Chemical resistance	Chemical resistant
Usage	Laboratory
Product code	SCL338/069
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Dishwashing Brush Used For?

Clean glassware is the starting point for reliable results. After a practical, soak the vessel in water with a laboratory detergent, then work the brush around the inside walls and base to lift dried residues, stains and precipitates that rinsing alone leaves behind. The 35 mm diameter suits beakers, dishes and other wide-mouth vessels.

Finish with a tap-water rinse and a final rinse of distilled water, and hang the brush or stand it bristles-up so it dries between uses. Keep a separate brush for greasy or heavily contaminated vessels, and use a slimmer brush for test tubes and burettes; good brushing is a basic part of lab glassware care.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Dishwashing Brush from Ambala, Haryana, among the cleaning and consumable items it sources for laboratories. Adding brushes to an order for glassware or apparatus lets a school or college receive everything on one quotation and one delivery. More about the company is on the ScienceLab company profile.
