Description :

Human Teeth Model, Lower Jaw, on Stand (Product Code: SLE/BL/93) is a dissected model of the lower left human jaw used to show how teeth are rooted in the jaw and served by nerves and blood vessels, in biology, anatomy and dental-science teaching. Enlarged about 3.5 times, it is coloured and identified with a numbered key card. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Model	Lower left human jaw with teeth
Enlargement	About 3.5 times
Dissection	Jaw dissected to show roots, nerves and vessels
Colouring	Appropriately coloured
Identification	Numbered key card
Mounting	Mounted on a base
Product code	SLE/BL/93
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Lower Jaw Teeth Model Used For?

From the outside a tooth looks small and simple, yet much of it lies hidden inside the jaw. By opening up the lower left jaw, this model shows how the roots sit in the bone and how nerves and vessels reach them — the background students need when a lesson turns to toothache, dental anaesthesia or root-canal treatment.

Teachers can point to each numbered structure and ask learners to name it from the key card, turning the model into a quick oral quiz. As school biology lab equipment it pairs well with a whole-jaw model: one shows where every tooth stands, the other shows what lies beneath.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known to customers by its brand ScienceLab, is the OEM (original equipment manufacturer) behind this jaw model. As an anatomical models manufacturer it produces at its own licensed factory at Saha, Ambala, Haryana, India, so buyers deal with the maker rather than a reseller.

Schools, medical and dental colleges, dealers and importers receive quotations straight from the manufacturer, and a replacement key card or a repeat order for matching lab sets can be reque
