Description :

Bee, Part of the Mouth, Whole Body (Product Code: SCL403/0101) is a prepared microscope slide used to examine a bee's mouthparts and its complete body outline in insect biology classes. Secondary and college students use it to see how one insect combines biting jaws with a nectar-collecting tongue, viewing a coloured preparation on borosilicate glass. This slide for entomology and pollination lessons is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Subject	Bee: part of the mouth and whole body
Preparation	Coloured
Glass type	Borosilicate
Packing box	White rectangular plastic box
Dimensions given	25.4 mm x 76.2 mm (1 x 3 in)
Application	Laboratory study
Product code	SCL403/0101
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Bee Mouthparts Slide Used For?

Bees have what biologists call chewing-lapping mouthparts: a pair of mandibles for handling wax and pollen, together with a long, flexible tongue that is extended to draw up nectar. On this preparation learners can compare those two tools and discuss why an insect that builds combs and feeds on flowers needs both. The whole-body part of the slide adds the head, thorax and abdomen, the two pairs of membranous wings and the hairy body surface that picks up pollen.

The slide fits naturally into lessons on pollination and on how mouthparts are adapted to diet, especially when shown next to the sponging proboscis of a house fly. Begin at low magnification to see the whole bee and its proportions, then centre the mouth region and step up the objective to separate mandibles from tongue. Students can record the comparison as a two-column table of structure and function.

Supplier

Supplied by ScienceLab, the brand under which Jain Scientific Equipments Private Limited of Ambala, Haryana trades, this bee slide is part of a wider offer of biology teaching materials for schools, colleges and distributors. Buyers equipping an insect-studies bench can request the slide together with microscopes, insect kits and storage in a single enquiry. Visit the ScienceLab company profile to learn more.
