Description :

Three Types of Bacteria, Stained (Product Code: SCL407/0103) is a prepared microscope slide of stained bacteria used to teach how bacteria are grouped by cell shape in school, college and nursing microbiology classes. Because the organisms are already coloured on borosilicate glass, students can study bacterial forms without culturing or staining anything themselves. Thispractical item of microbiology lab equipment is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India.

Specifications

Parameter	Detail
Subject	Three types of bacteria
Preparation	Stained (coloured)
Slide material	Borosilicate glass
Box	Plastic, white, rectangular
Dimensions listed	25.4 mm x 76.2 mm (1 x 3 in)
Use	Laboratory
Product code	SCL407/0103
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Three Types of Bacteria Slide Used For?

Shape is the first thing a microbiology student learns to describe, and a three-type bacteria slide is normally prepared to show the basic forms side by side: round cocci, rod-shaped bacilli and spiral or curved bacteria. Learners practise recognising each shape and noticing how cells group into pairs, chains or clusters, which is the starting point for later work on identification and on the bacteria behind common diseases.

Bacteria are tiny, so this is a slide for the highest objectives. Locate the stained area at low power, move up step by step, and use an oil-immersion objective with a drop of immersion oil for the final view; wipe the oil off the slide and lens with lens tissue afterwards. Drawing a few cells of each shape to scale is a simple way to reinforce the lesson.

Supplier

ScienceLab is how Jain Scientific Equipments Private Limited, based in Ambala in Haryana, is known to its customers. The company supplies stained microbiology slides such as this one to schools, colleges, nursing and paramedical institutes and trade buyers in India and international markets, and can quote microscopes and immersion oil on the same order. More information is on the ScienceLab company profile.
