## What Is the Hair Follicle Skin Slide Used For?

In human biology and histology lessons, this slide shows students that a hair grows from a follicle set deep in the skin rather than from the surface. Structures commonly identified in a skin section of this kind include the layered epidermis, the dermis, the hair shaft and root inside the follicle, and nearby sebaceous glands. Because the preparation is coloured, the tissue layers contrast with one another, which helps beginners tell them apart.

Start with a low-power objective to find the follicle and follow it from the surface downwards, then switch to a higher objective for cell detail. Asking students to sketch and label the section is a simple way to turn the slide into a recorded practical for senior-school and first-year college courses.

## Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, based in Ambala, Haryana. The company supplies prepared slides such as this skin and hair follicle section alongside microscopes, models and charts, so a school or college can source a complete histology practical from one vendor. For vendor registration, the supplying company is Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597, GSTIN 06AAECJ8618A1ZT). More background is on the ScienceLab company profile.
