Description :

Lizard Dissection (Product Code: SCL441/0120) is a dissected lizard specimen preserved in formalin and closed in a glass container, used to show reptile internal anatomy in zoology teaching labs. It gives students a ready-to-view dissection without handling an animalthemselves, with a listed size of 200 x 70 x 40 mm. Stocked as zoology lab equipment for schoolsand colleges, the specimen is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Specimen	Lizard, dissected
Preservative	Formalin
Container	Closed glass container
Listed size	200 x 70 x 40 mm (20 x 7 x 4 cm)
Product code	SCL441/0120
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Lizard Dissection Specimen Used For?

Preserved dissections are used where fresh dissection is not practical, and for revision before practical examinations. With a lizard specimen, teachers can point out the organs usually taught for reptiles — such as the heart, lungs, liver, stomach and intestine — and compare them with those of amphibians and birds. Because the dissection stays in its closed container, one specimen can serve many classes.

Place the container on a white surface in good light and let small groups examine it in turn, using a hand lens for finer structures. Pairing it with a lizard skeleton helps students relate the organs to the body framework around them.

What to Specify When Ordering

- Which specimens you need — lizard, frog, fish, chicken and rabbit dissections are listed separately.
- The number of specimens for each laboratory.
- Whether the listed 200 x 70 x 40 mm size must fit an existing display cabinet, so we can confirm it.
- The delivery destination, since glass containers holding formalin need careful transport.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, supplies preserved dissection specimens such as this lizard to zoology departments. Buyers can combine specimens with skeletons, models and dissecting instruments in one enquiry.
