Description :

Chicken Dissection (Product Code: SCL201/0121) is a preserved dissection specimen, kept in formalin and closed in a glass container, used to teach bird anatomy in biology and zoology classrooms. Teachers use it to show the internal organs of a bird without carrying out a fresh dissection, and it is listed at 200 x 70 x 40 mm. As a biological lab specimen, it is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India.

Specifications

Parameter	Detail
Specimen	Chicken, dissected
Preservation	Formalin
Housing	Glass container, closed
Size (as listed)	200 x 70 x 40 mm
Product code	SCL201/0121
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Chicken Dissection Specimen Used For?

A bird specimen shows how anatomy supports flight and a high-energy way of life. Lessons on bird anatomy commonly cover the crop and gizzard, the air-sac breathing system and the four-chambered heart, and compare them with the organs of amphibians and reptiles. A preserved dissection gives every student a real reference for where these organs sit.

Use it towards the end of a vertebrate series — fish, frog, lizard, chicken, rabbit — to discuss how organ systems change between classes. Keep the container on a stable tray and let students sketch the view through the glass.

Supplier

The Chicken Dissection is sourced and supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala in Haryana. Zoology laboratories can obtain it together with other preserved dissections and dissecting instruments, keeping their purchasing with one vendor. Company information is on the ScienceLab profile.

Related Laboratory Equipment

Useful additions for a comparative vertebrate anatomy practical:

- Rabbit Dissection — a mammal specimen for comparison with the bird.
- Fish Dissection — a fish specimen to begin the vertebrate series.
- Dissecting Set, Student — a stainless steel instrument set for students' own practical dissections.
