Description :

Brain Building (Product Code: SCL231/0136) is a human brain model sectioned along the midsagittal plane, used to teach brain structure in biology, psychology and anatomy classrooms.It separates into two hemispheres, so students can study both the outer surface and the cutmidline face. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEMmanufacturer and laboratory instruments supplier in India, at its own factory in Ambala, as a 3DPVC anatomical cast of a real human brain.

Key Details

Parameter	Detail
Subject	Human brain
Section	Midsagittal (divided along the midline)
Parts	Two separate hemispheres
Basis	Anatomic cast of a real human brain
Construction	3-dimensional PVC moulding with non-toxic dye
Product code	SCL231/0136
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Midsagittal Brain Model Used For?

A midsagittal cut is the classic way to show structures that sit deep along the brain's midline and cannot be seen from the outside. Separating the two hemispheres of the Brain Building model gives students the cut face on each half, while the outer surface remains available for lessons on lobes, folds and grooves of the cerebrum.

Teachers use it for the nervous system and coordination chapter in senior biology, for introductory psychology on brain regions, and for first-year anatomy practicals. A useful exercise is to hand one hemisphere to each half of the class and have groups teach each other what they identified. As human anatomical models go, a two-part brain is quick to set up and return to storage.

OEM Manufacturer

The Brain Building model is manufactured by ScienceLab, which is the business name of Jain Scientific Equipments Private Limited. The company is the OEM and makes this brain model at its own licensed factory at Saha, Ambala, Haryana, India; institutions and trade buyers are supplied factory-direct. The company profile gives more background.

Buying from the manufacturer means the same team handles your quotation, answers questions about the model and fulfils repeat orders when more laboratories are equipped.
