Description :

Cross Section of the Head (Product Code: SCL241/0141) is a three-dimensional PVC anatomical model used to show the internal structure of the human head, including the brain and its blood vessels, in biology and anatomy teaching. Measuring 250 x 350 mm and fixed firmly ona plastic base, it gives teachers and students a clear sectional view for close observation. It ismade by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of human anatomical models, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Model	Cross section of the human head
Structures highlighted	Brain structure and blood vessel structure
Size	250 x 350 mm
Labelling	Detailed numbered annotations
Construction	3-dimensional PVC moulding; light weight, high-strength PVC plastic
Colouring	Non-toxic dye
Mounting	Fixed firmly on a plastic base
Product code	SCL241/0141
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Head Cross Section Model Used For?

A sectional head model lets students see how the brain sits inside the skull and how blood vessels supply it — relationships that are hard to picture from a flat textbook drawing. Teachers use the Cross Section of the Head to introduce the main regions of the brain, trace the vessels and link each feature to its numbered annotation, which also makes the model handy for revision and self-testing.

It fits senior-secondary biology classes, nursing and paramedical anatomy sessions and health-science demonstrations. Because the PVC is light, the model can be passed carefully between groups; keep it on its base when not in use. Institutions building a set of human anatomical models often pair it with a separate brain model so learners can compare the sectional and whole-organ views.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, the original equipment manufacturer of the Cross Section of the Head. The company makes this model at its own licensed factory at Saha, Ambala, Haryana, India, so schools, colleges, dealers and impor
