Description :

Animal Cell Model 1 (Product Code: SCL251/0146) is a three-dimensional PVC model of an animal cell used to teach cell structure and organelle functions in school and college biology. One side is dissected to show the complete internal detail, and the model is mounted on a board witha key card for identifying each part. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Size	180 x 300 x 60 mm
Presentation	One side dissected to show complete internal detail
Mounting	On a board
Identification	Key card
Construction	3-dimensional PVC moulding
Colouring	Non-toxic dye
Product code	SCL251/0146
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Animal Cell Model Used For?

Animal cells have no cell wall, so a typical lesson concentrates on the cell membrane, the cytoplasm, the nucleus and organelles such as mitochondria and the endoplasmic reticulum. Because one side of Animal Cell Model 1 is dissected, students see the outer surface and the interior at the same time and can relate where each organelle sits to the job it does.

The key card turns the model into a quick identification exercise: cover the names, point to a structure and ask the class to name it. Board-mounted and 180 x 300 x 60 mm in size, it stands on a desk or passes easily around a small group. Buyers sourcing an animal cell model in India often pair it with Plant Cell Model 1, which has the same dimensions, so both cell types can be compared directly.

OEM Manufacturer

Animal Cell Model 1 is manufactured by ScienceLab, the brand name of Jain Scientific Equipments Private Limited, acting as the OEM. The company makes it at its own licensed factory at Saha, Ambala, Haryana, India, and supplies schools, coaching centres, colleges, dealers and importers without an intermediary. Background on the company is on the ScienceLab profile.
