Description :

Digestive System 1 (Product Code: SCL275/0158) is a laminated wall chart used to teach how food is broken down and absorbed along the human digestive tract in biology classrooms and laboratories. Its 70 cm x 100 cm wall-mounted format suits a school biology lab setup, giving teachers a permanent reference beside the bench during a nutrition unit. **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, makes it at its own factory inAmbala, India.

Specifications

Parameter	Detail
Topic	Human digestive system
Type	Wall-mounted chart
Finish	Laminated
Size	70 cm x 100 cm
Used in	Laboratories and classrooms
Product code	SCL275/0158
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Digestive System Chart Used For?

During a nutrition and digestion unit, the chart lets the teacher walk students through the alimentary canal in order, from the mouth and oesophagus to the stomach, small intestine and large intestine, and point out where accessory glands such as the liver and pancreas release their secretions. Students can then relate each stage to what happens to carbohydrates, proteins and fats.

Many teachers put the chart up before a food-test or enzyme practical, so pupils know where starch, protein and fat digestion take place before they run the tests themselves. The laminated surface can be wiped after pointer use or handling, which helps in busy shared labs.

OEM Manufacturer

Digestive System 1 comes from the Ambala factory of Jain Scientific Equipments Private Limited, the company that trades as ScienceLab and acts as the OEM for its biology chart range. It is made at the company's own licensed factory at Saha, Ambala, Haryana, India, so schools, colleges, distributors and importers buy it directly from the manufacturer rather than from a reseller. Company background is on the ScienceLab profile page.
