Description :

Human Muscles (Product Code: SCL287/0164) is a laminated wall chart used to teach the muscular system of the human body in biology, physical education and health classrooms. Its 70 cm x 100 cm wall-mounted format lets PE and biology teachers point to muscle groups while students test the movements on themselves. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, among its biology teaching aids.

Specifications

Parameter	Detail
Topic	Human muscles (muscular system)
Type	Wall-mounted chart
Finish	Laminated
Size	70 cm x 100 cm
Setting	Laboratories and classrooms
Product code	SCL287/0164
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Muscles Chart Used For?

The chart backs up lessons on how skeletal muscles such as the biceps, triceps, quadriceps and hamstrings work in antagonistic pairs, pulling on bones through tendons to move joints. Teachers also use it to introduce the three muscle types (skeletal, smooth and cardiac) and to explain why muscles tire during exercise.

In physical education, it helps students name the muscles they warm up and stretch, which makes fitness and injury-prevention lessons more concrete. Pair it with a muscular figure model or muscle-tissue slides when the class moves from gross anatomy to tissue structure.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, is the original equipment manufacturer of the Human Muscles chart. The company makes it at its own licensed factory at Saha, Ambala, Haryana, India, and supplies schools, physical-education colleges, dealers and importers without a middleman. Because the maker handles every order, extra copies for new classrooms can be requested directly. Company information is on the ScienceLab profile.
