Description :

The Constituent Parts of the Skin (Product Code: SCL301/0171) is a laminated wall chart used to teach the layers and structures of the skin in school and college biology classrooms. Teachers use the 70 cm x 100 cm wall-mounted sheet when explaining how skin protects the body, controls temperature and senses touch, heat and pain. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, and fits naturally into a school biology lab setup.

Specifications

Parameter	Detail
Topic	Constituent parts of the skin (skin structure)
Type	Wall-mounted chart
Finish	Laminated
Size	70 cm x 100 cm
Setting	Laboratories and classrooms
Product code	SCL301/0171
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Skin Structure Chart Used For?

Teachers use the chart to explain the skin's three main layers: the epidermis with its protective outer cells, the dermis containing blood vessels, nerve endings, hair follicles, sweat glands and sebaceous glands, and the fatty subcutaneous layer beneath. Students then connect each part to a job, such as sweating to cool the body or melanin shielding deeper tissue from ultraviolet light.

The chart supports lessons on homeostasis, excretion and the sense organs, and gives health classes a basis for discussing sun protection, burns and hygiene. Use it alongside an enlarged skin model or prepared skin slides so students see the same structures in three dimensions and under the microscope.

OEM Manufacturer

The Constituent Parts of the Skin chart is manufactured by Jain Scientific Equipments Private Limited under its ScienceLab trading name, with the company acting as OEM. Production is at its own licensed factory at Saha, Ambala, Haryana, India, so schools, colleges, dealers and importers receive the chart and their quotation from the maker rather than a trading house. Additional copies or replacements can be arranged by asking us directly. More about the company is on the ScienceLab profile.
