Description :

Circulatory System (Product Code: SCL309/0175) is a laminated wall chart used to teach how the heart, blood vessels and blood carry oxygen, nutrients and wastes around the human body, in school biology laboratories and classrooms. Its 70 cm x 100 cm format gives the whole class one shared picture during lessons on the heart and blood flow, making it a handy biology teaching aid for this unit. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM scientific instruments manufacturer in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Subject	Human circulatory system
Format	Wall-mounted chart
Surface	Laminated
Size	70 cm x 100 cm
Where used	Laboratories and classrooms
Product code	SCL309/0175
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Circulatory System Chart Used For?

Teachers use the chart to trace the double circulation of the human body: blood leaves the right side of the heart for the lungs to collect oxygen, returns to the left side, and is then pumped through arteries to the organs before veins bring it back. Following that loop on a large wall chart helps students see why the heart is really a pair of pumps working side by side.

The chart also supports lessons on how arteries, veins and capillaries differ, on pulse and blood pressure, and on everyday habits that keep the heart healthy. For a quick practical, students can measure each other's pulse before and after light exercise and relate the change back to the diagram.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, manufactures the Circulatory System chart as the OEM. Production is at the company's own licensed factory at Saha, Ambala, Haryana, India, and charts go out factory-direct to schools, colleges, dealers and importers. For replacements or additional copies, buyers simply ask the manufacturer. Visit the ScienceLab company profile to learn more.
