Description :

Human Skeleton 1 (Product Code: SCL314/0177) is a laminated wall chart used to teach the names and positions of the bones of the human skeleton, in school biology laboratories and classrooms. At 70 cm x 100 cm, it lets a teacher point to individual bones while students follow from their seats, and it makes a flat companion to a skeleton model in any biology chart set for schools. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEMmanufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Topic	Human skeleton
Product type	Wall chart (not a three-dimensional model)
Finish	Laminated
Size	70 cm x 100 cm
Use	Laboratories and classrooms
Product code	SCL314/0177
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Skeleton Chart Used For?

Teachers use the chart to introduce the axial skeleton — skull, vertebral column and rib cage — and the appendicular skeleton of the limbs and their girdles. It helps students connect bone names with their jobs: protecting organs, supporting the body, allowing movement together with muscles, and producing blood cells in the marrow.

Because a chart stays on the wall, it is handy for quick labelling quizzes and revision before exams. Schools that also own a skeleton model often hang the chart beside it so students can move between the flat diagram and real three-dimensional bones, and physical-education teachers use it when discussing joints and posture.

OEM Manufacturer

The Human Skeleton 1 chart is manufactured by Jain Scientific Equipments Private Limited, trading as ScienceLab, which is its OEM. The company makes it at its own licensed factory at Saha, Ambala, Haryana, India, and sells factory-direct to schools, colleges, sports-science departments, dealers and importers. Questions about repeat orders go straight to the maker, with no middleman in between. More about the company is on the ScienceLab company profile.
