Description :

AIDS (Product Code: SCL326/0183) is a laminated wall chart used to teach how HIV infectioncan lead to AIDS and how the infection can be prevented, in school biology and health education classrooms. Its 70 cm x 100 cm format supports calm, factual whole-class discussion of a sensitive topic and makes a useful addition to a biology chart set for schools. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Topic	AIDS (acquired immunodeficiency syndrome)
Type	Wall-mounted chart
Finish	Laminated
Size	70 cm x 100 cm
Used in	Laboratories and classrooms
Product code	SCL326/0183
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the AIDS Chart Used For?

AIDS (acquired immunodeficiency syndrome) is the advanced stage of infection with HIV, the human immunodeficiency virus, which attacks the white blood cells that coordinate the body's immune response. Teachers use the chart to explain how the virus weakens the body's defences, how it is and is not passed from person to person, and why testing and treatment matter.

The chart fits biology units on the immune system as well as life-skills and health education sessions, where accurate information helps reduce fear and stigma. Older students can follow it up with a simulated testing activity, and school health clubs can display it during awareness events.

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, is the OEM that makes the AIDS chart at its own licensed factory at Saha, Ambala, Haryana, India. Schools, colleges, health-education programmes, dealers and importers can buy it straight from the maker, without a trading middleman. Repeat orders and quotations are handled by the manufacturer itself. For company background, see the ScienceLab company profile.
