Description :

Damage from Smoking (Product Code: SCL332/0186) is a laminated wall chart used to show students how tobacco smoke harms the lungs, heart and other organs, in biology laboratories and health education classrooms. The 70 cm x 100 cm chart is one of the biology teaching aids schools rely on for anti-smoking lessons, giving the whole class one clear visual to discuss. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Theme	Damage caused by smoking
Mounting	Wall mounted
Finish	Laminated
Size	70 cm x 100 cm
Where used	Laboratories and classrooms
Product code	SCL332/0186
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Damage from Smoking Chart Used For?

Tobacco smoke contains nicotine, tar and carbon monoxide. Teachers use the chart to explain how tar coats the airways and lungs, how carbon monoxide reduces the blood's ability to carry oxygen, and how smoking raises the risk of lung disease, heart disease and several cancers.

The chart pairs well with a classroom smoking-machine demonstration, in which the residue from a burning cigarette collects on cotton wool and makes the damage visible. It also supports discussions on passive smoking, nicotine addiction and the benefits of quitting at any age.

OEM Manufacturer

The Damage from Smoking chart is made by Jain Scientific Equipments Private Limited, which trades as ScienceLab and is the product's OEM. Manufacturing happens at the company's own licensed factory at Saha, Ambala, Haryana, India, and the chart is sold factory-direct to schools, colleges, health programmes, dealers and importers. Buyers who need more copies later simply contact the manufacturer again. More information is on the ScienceLab company profile.
