Description :

Test Tube Clips (Product Code: SCI-524/017) is a wooden test tube holder used to grip a single test tube while it is heated, shaken or poured in school and college laboratories. Because wood is a poor conductor of heat, students can hold a hot tube over a flame at a safe distance instead of touching the glass, which makes the clip basic school chemistry lab equipment. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM scientific instruments manufacturer in India, at its own factory in Ambala.

Key Details

Parameter	Detail
Material	Wood
Purpose	Holding a test tube when it is hot or should not be touched
Product code	SCI-524/017
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a Test Tube Clip Used For?

The clip is used whenever a test tube should not be held by hand: heating a liquid or solid over a spirit lamp or burner, carrying a tube that holds a corrosive reagent, or shaking a warm mixture. Grip the tube near its mouth, about a third of the way down, so that the clip stays well above the flame and the lower part of the tube can be heated evenly.

When heating a liquid, tilt the tube, point the mouth away from yourself and others, and move it gently in the flame so that the contents do not bump out. Keep the wooden clip itself out of the flame, as it can scorch, and let it cool before storing it. A set of clips alongside test tubes and a rack forms a basic chemistry experiment kit for each bench.

What to Specify When Ordering

- The number of clips, for example one per student or pair.
- The diameters of the test tubes the clip must hold, since the grip size is not listed.
- Matching test tubes and racks, if they should be quoted together.

OEM Manufacturer

Test Tube Clips are made by ScienceLab, the trading name of Jain Scientific Equipments Private Limited, which is the OEM (original equipment manufacturer) and produces them at its own licensed factory at Saha, Ambala, Haryana, India. Schools, colleges, dealers and importers order them factory-direct, and bulk or repeat quantities are quoted by the manufacturer itself rather than through a middleman.
