Product Name :

Pipette Holders

Product Code :

SCI-159/018

Image not found or type unknown

Description :

Pipette Holders (Product Code: SCI-159/018) is a rotating plastic carousel stand used to keepup to 15 pipettes upright and within reach on the bench in teaching, research and clinical laboratories. The circular white stand turns so users can pick the pipette they need, holds multichannel micropipettes as well, and has a stable base for one-handed use — a tidy piece of lab plastic ware. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Holding capacity	15 pipettes
Orientation	Vertical
Design	Circular, rotating carousel
Material	Plastic
Colour	White
Multichannel micropipettes	Can be held
Base	Stable, for single-handed operation
Product code	SCI-159/018
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a Pipette Holder Used For?

Micropipettes are best stored upright: lying on the bench, a pipette with liquid left in its tip can let that liquid run back towards the piston, and the pipette can roll, fall or be knocked. A carousel holder parks each pipette vertically after use, keeps a set of different volumes together at one workstation, and frees bench space in busy practical classes.

Remove the used tip before placing a pipette in the stand, then turn the carousel to bring the required volume within reach and lift it out with one hand while the stable base stays put. Wipe the stand with a damp cloth and mild detergent when it gets dusty or splashed. It is a small but useful part of the microbiology lab equipment in India's colleges and research laboratories.

What to Specify When Ordering

- The number of stands, for example one per workstation.
- The pipette types to be held, single-channel or multichannel, so the fit can be confirmed.
- How many pipettes each bench uses, as each stand holds 15.
