Description :

Laboratory Protective Glass (Product Code: SCI-411/045) is impact-resistant protective eyewear used to guard the eyes against flying fragments and debris during practical work in school, college and workshop laboratories. A high wrap lens, side protection and adjustable arms give wide coverage and a secure unisex fit on a lightweight frame. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India, for institutions sourcing safety goggles and spectacles for school labs at home and abroad.

Key Details

Parameter	Detail
Type	Protective eyewear (safety spectacles)
Lens	High wrap lens giving impact protection and an unobstructed view
Side coverage	Side protection design
Arms	Adjustable
Frame	Comfortable, lightweight; unisex style
Impact	Impact resistant
Environment	Designed for indoor or outdoor use
Product code	SCI-411/045
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Laboratory Protective Glass Used For?

Students and technicians wear it whenever something could strike the eyes: cutting and snapping glass tubing, heating glassware that might crack, chipping rock samples, or working with stretched springs and wires in physics. Because it is designed for indoor or outdoor use, the same pair can go on field trips and outdoor workshop tasks.

Adjust the arms so the frame sits snugly without pressing; the wrap lens keeps the view clear, which helps students keep their eyewear on for the whole session. Rinse the lens with water and dry it with a soft cloth rather than wiping off dry dust. Where corrosive liquids could splash, sealed chemical-splash goggles are generally the safer choice.

What to Specify When Ordering

- Number of pairs — typically one per student in the largest class plus staff
- Whether any users wear prescription spectacles, so fit can be confirmed
- Whether masks and gloves should be quoted with the eyewear as a safety set
