Description :

Measuring Cylinder 50ml (Product Code: SCI-869/049) is a graduated borosilicate glasscylinder used to measure out liquids up to 50 ml for everyday practicals in school and collegelaboratories. Its 1 ml divisions are straightforward for younger students to read, so it is a commonchoice for middle-school chemistry and physics work. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Capacity	50 ml
Graduation interval	1 ml (listed as “glass separation rate”)
Material	Borosilicate glass
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Marking	Graduated
Product code	SCI-869/049
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a 50 ml Measuring Cylinder Used For?

Typical lessons include measuring a fixed volume of water to test how much salt or sugar dissolves in it, measuring acid for a neutralisation or a rate-of-reaction experiment, and finding the volume of a small stone, marble or key by water displacement. Its size suits individual students or pairs working at the bench.

Bring your eye down to the level of the liquid rather than lifting the cylinder, and read the bottom of the meniscus to avoid parallax errors. Borosilicate glass copes with warm solutions and chemical attack, yet hot liquids expand, so measure after cooling if you want readings that compare fairly with cold ones.

What to Specify When Ordering

- Quantity needed for each class or kit
- Companion capacities from the series, if you are building a set
- Delivery location, and whether the order is for local supply or export
