Description :

Chemical Beaker 50ml (Product Code: SCI-755/054) is a small, clear borosilicate glass beaker used to hold, mix, dissolve and gently heat small quantities of chemicals in school and college laboratories. Its heat and chemical resistance and graduated side make it a practical vessel for individual student reactions where larger glassware would waste reagent. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, within its borosilicate glassware range.

Specifications

Parameter	Detail
Capacity	50 ml
Material	Borosilicate glass
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Marking	Graduated
Colour	Clear
Product code	SCI-755/054
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a 50 ml Chemical Beaker Used For?

This size suits one student or a pair: dissolving a spatula of copper sulphate to see the colour develop, testing small samples with indicator paper, or adding acid drop by drop to a little alkali in a neutralisation. It also works as a weighing vessel for small amounts of solid, and the clear glass shows bubbles, colour changes and precipitates plainly.

To heat it, stand it on a wire gauze over a tripod, use a small flame and keep it no more than about half full; lift it with beaker tongs once hot. The graduations give approximate volumes only, so measure first in a cylinder when the amount matters. Schools often buy it as the smallest member of a beaker set for labs in India and abroad.

What to Specify When Ordering

- Number of beakers — commonly one or two per student place
- Other beaker capacities to complete a graduated set
- Tongs, gauzes or stirrers to be quoted with the glassware

OEM Manufacturer

This beaker is made by Jain Scientific Equipments Private Limited, the company that trades as Scien
