Description :

Chemical Beaker 1000 ml (Product Code: SCI-588/058) is a one-litre, graduated borosilicate glass beaker used to prepare, heat and hold larger volumes of liquid in chemistry, biology and general science laboratories. Lab technicians rely on this size for making up bulk solutions andfor water baths deep enough to warm several test tubes at once, and the clear glass shows the contents at a glance. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM and laboratory glassware manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Capacity	1000 ml (one litre)
Material	Borosilicate glass
Volume scale	Graduated
Colour	Clear
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Product code	SCI-588/058
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 1000 ml Chemical Beaker Used For?

The litre beaker takes on the big-volume tasks of a teaching lab: dissolving salts to make a full litre of stock solution for a practical class, holding a water bath in which test tubes, thermometers or small flasks warm evenly, collecting distilled water for the day's experiments, and soaking small glassware before cleaning. Its heat and chemical resistance mean the same vessel can go from the burner to the bench without transferring the contents.

A litre of hot liquid is heavy, so support a full beaker on a sturdy tripod with gauze, fill it only as far as the task needs, and move it with beaker tongs or both hands once it has cooled enough to handle. The scale helps with rough dilutions; accurate volumes should still be measured in a cylinder or pipette. It is a staple of chemistry lab equipment for schools in India and overseas.

OEM Manufacturer

This 1000 ml beaker is an original ScienceLab product. Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM and makes it at its licensed factory in Saha, Ambala, Haryana — so institutions and distributors buy from the source rather than from a reseller.

Quotations, bulk lab-set orders and later top-up orders are all handled by the manufacturer itself; if you[illegible]age.
