Description :

Alcohol Lamp 150 ml (Product Code: SCI-626/069) is a round borosilicate glass spirit lamp used to give a small, clean flame for heating, sterilising and flame tests in laboratories without a gas line. The 150 ml reservoir burns liquid alcohol fuel, a cap covers the burner between sessions, and the glass is listed with a low linear coefficient of expansion and a high annealing point. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM and school laboratory equipment manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Capacity	150 ml
Material	Borosilicate glass
Shape	Round
Cap	With cap (listed as “plasma cap”)
Glass properties	Low linear coefficient of expansion; high annealing point
Product code	SCI-626/069
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is an Alcohol Lamp Used For?

Where there is no piped gas, the alcohol lamp is the standard heat source for small jobs: warming a few millilitres in a test tube, melting wax or sulphur in a spoon, heating a glass rod for simple bending, and flaming inoculating loops and needles in microbiology before and after transfers. Its gentle, non-sooty flame also suits flame colour observations and warming slides. The low-expansion borosilicate body copes better with the temperature difference between the flame zone and the cool fuel than ordinary glass.

Fill it no more than about two-thirds with denatured spirit, wipe away spills and trim the wick before lighting. Never refill or carry the lamp while it is lit; to put it out, place the cap over the flame rather than blowing, and store the lamp capped so the fuel does not evaporate.

OEM Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM of the Alcohol Lamp 150 ml and makes it at its own licensed factory in Saha, Ambala, Haryana, India. Schools, colleges, training institutes, dealers and importers can buy it factory-direct instead of through a stockist.

Repeat orders and replacement lamps are handled by the same manufacturer — ask us whenever you need them. The company profile has more about ScienceLab.
