Product Name :

Glass Bottle, Wide-Mouthed

Product Code :

SCI-617/100

Image not found or type unknown

Description :

Glass Bottle, Wide-Mouthed (Product Code: SCI-617/100) is a 60 ml coloured glass bottle witha wide mouth and corrugated cap, used to store chemical reagents that need to be scooped orfilled easily in school and college laboratories. The wide opening admits a spatula for powdersand crystals, and the coloured glass helps shield light-sensitive contents. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Material	Glass
Mouth	Wide mouthed
Closure	Corrugated cap
Capacity	60 ml
Colour	Coloured
Use	Chemical reagents
Heat resistance	Heat resistant
Product code	SCI-617/100
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Wide-Mouth Glass Bottle Used For?

Wide-mouth bottles are the usual home for solid reagents such as salts, crystals and granules used in qualitative analysis and preparation practicals. Students can lift out a small amount with a spatula without tipping the bottle, which keeps the stock clean and reduces waste. The 60 ml size holds a bench-level portion drawn from larger store containers.

Always use a clean, dry spatula so moisture and other chemicals do not get into the bottle, and close the corrugated cap promptly because many salts absorb moisture from the air. Label each bottle with the reagent name, as coloured glass makes the contents hard to identify. Bottles like this appear on most school chemistry lab equipment lists in India.

What to Specify When Ordering

- Mouth: wide (this listing); narrow-mouth bottles suit liquids that are poured.
- Closure: corrugated cap; a similar wide-mouth bottle with a different closure is listed separately.
- Capacity: 60 ml, code SCI-617/100.
- Quantity: one bottle per solid reagent on each shelf or bench.
