Description :

Wide-Mouthed Glass Bottle (Product Code: SCI-614/101) is a 60 ml coloured glass bottle with a wide mouth and cork screw closure, used to hold chemical reagents, particularly the solids handed out in salt analysis and other qualitative practicals. Its wide neck lets students take a sample with a spatula, while the coloured glass helps shield light-sensitive contents. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Material	Glass
Mouth	Wide mouthed
Closure	Cork screw (confirm closure style when ordering)
Capacity	60 ml
Colour	Coloured
Use	Chemical reagents
Heat resistance	Heat resistant
Product code	SCI-614/101
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Wide-Mouthed Glass Bottle Used For?

In salt analysis practicals, each unknown salt or test reagent is often issued in its own small labelled bottle, so students can take a spatula-tip sample for dry tests and solution tests. This 60 ml wide-mouthed bottle suits that job, and a set of them can form a school salt analysis kit that is refilled each term.

Close the bottle straight after sampling to keep out moisture and prevent cross-contamination, and never return unused material to it. As the glass is coloured, give each bottle a clear label or number that matches the teacher's record sheet. After washing, remove the closure and let the heat-resistant glass dry in warm air.

What to Specify When Ordering

- Closure: cork screw as listed — confirm the closure style in your quotation; a corrugated-cap version is listed separately.
- Capacity: 60 ml, code SCI-614/101.
- Quantity: for example, one bottle per unknown salt for each student group.
