Product Name :

Funnels Set, Polythene

Product Code :

SLE/P/17

Description :

Funnels Set, Polythene (Product Code: SLE/P/17) is a set of three plastic funnels used to transfer liquids or sand between containers and to compare the flow rates of sand or water in primary and secondary school science. The funnels measure 75 mm, 95 mm and 120 mm in diameter and are made from flexible yet strong polythene. The set is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of junior science lab equipment and a lab plasticware supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Contents	Set of 3 funnels
Diameters	75 mm, 95 mm and 120 mm
Material	Polythene, flexible yet strong
Typical activities	Flow rates of sand or water; transfer of liquids or sand between containers
Product code	SLE/P/17
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a Polythene Funnel Set Used For?

With three mouth sizes in one set, pupils can investigate how funnel size changes how quickly sand or water flows through, timing each funnel and recording the results in a table. The same funnels double as everyday pouring aids for moving water, sand or dry granules from a jug into a narrow-necked bottle without spills. The set also fits neatly into a junior lab kit for primary school classrooms.

Because polythene flexes rather than cracks, the set suits younger students and sand-tray activities. Keep separate funnels for sand and for liquids where possible, rinse and dry them after use, and keep them away from hot liquids and flames. For filtration with filter paper, a dedicated filter funnel gives a better fit.

What to Specify When Ordering

- Number of sets (each set contains three funnels of 75 mm, 95 mm and 120 mm).
- Whether the funnels are for flow-rate investigations, general pouring or both, so companion items can be quoted.
- Any filter funnels, beakers or measuring cylinders needed for the same activity.

OEM Manufacturer

ScienceLab is the brand under which Jain Scientific Equipments Private Limited manufactures this polythene funnel set as the OEM (original equipment manufacturer). The funnels are produ ed factor manu ce, so as
