Description :

Chemical Symbols and Formulas (Product Code: SCI-538/111) is a laminated wall chart usedto teach how element symbols combine into the chemical formulas that describe compounds, in school and college chemistry lessons. Sized at 70 cm x 100 cm for wall mounting, it supports students as they move from single symbols to reading and writing formulas on their own. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and laboratory equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Topic	Chemical symbols and formulas
Format	Wall-mounted chart
Size	70 cm x 100 cm
Finish	Laminated
Setting	Classrooms and laboratories
Product code	SCI-538/111
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Chemical Symbols and Formulas Chart Used For?

A chemical formula tells students which elements a substance contains and in what ratio. In H_2O the subscript shows two hydrogen atoms for every oxygen atom; in CO_2 one carbon atom is joined to two oxygen atoms; and NaCl shows sodium and chlorine combined one to one. Once students read formulas confidently, they can work out valency, name compounds and balance equations.

Teachers bring the chart into lessons on valency and naming compounds, use it as a check while students write equations, and point to it during revision before tests. It is especially helpful beside ball-and-stick models, which let students build the molecule a formula describes, and it rounds out the wall displays of any school chemistry lab.

OEM Manufacturer

ScienceLab (Jain Scientific Equipments Private Limited) is the original equipment manufacturer of the Chemical Symbols and Formulas chart. The chart is produced at the company's own licensed factory at Saha, Ambala, Haryana, and sold factory-direct rather than through a trader, which keeps quotations simple for schools, colleges, dealers and importers. Replacement copies for a department are handled by the manufacturer too — ask us when you need them. Read the ScienceLab profile for background.
