Description :

Denatured Ethanol (Alcohol for burning) (Product Code: SCI-921/126) is ethanol made unfitfor drinking, used as fuel for spirit lamps and alcohol burners in school, college and fieldlaboratories where gas burners are not available. It comes as a 5 liter bulk quantity with an MSDSfor decanting into lamps as needed, and the listing describes it as analytical reagent grade. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory chemicals supplier in India.

Specifications

Parameter	Detail
Grade	Analytical reagent (as stated in the product listing)
Capacity	5 liters
Safety documentation	MSDS supplied
Shelf life	Shelf life depends on the chemical, its grade and storageconditions; ask us for the expiry date of the batch you are quoted.
Product code	SCI-921/126
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Denatured Ethanol Used For?

Denatured ethanol fuels spirit lamps and alcohol burners, giving a steady, nearly soot-free flame for heating test tubes, melting wax, warming small beakers and flaming inoculating loops. Schools planning a school laboratory setup in India without piped gas often rely on these lamps, and a bulk container keeps every lamp in the room topped up between practicals.

Refill lamps only when they are cold and unlit, working away from any flame, and wipe up spills before relighting. Decant from the 5 liter container into a small dispensing bottle for classroom use, keep the bulk stock sealed in a flammables cabinet, and label every container clearly so nobody mistakes it for water.

Supplier

Jain Scientific Equipments Private Limited trades as ScienceLab and supplies lamp fuel such as this Denatured Ethanol together with the alcohol lamps, burners and stands used with it. Institutions and dealers adding the company to a vendor list can use its registration details: CIN U29309HR2020PTC087597 and GSTIN 06AAECJ8618A1ZT. Find out more on the ScienceLab profile.
