Product Name :

Balance Simple Beam

Product Code :

SLE/MAT/06

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Balance Simple Beam (Product Code: SLE/MAT/06) is a durable plastic bucket balance used to teach measurement and the basic concepts of mass and balance in primary maths and early science lessons. Its buckets detach for easy clean-up, and a sliding compensator lets the teacher zero the beam before any comparison begins. The balance is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Material	Durable plastic
Buckets	Detachable, for easy clean-up
Zero adjustment	Sliding compensator
Teaching focus	Measurement and the basic concept of mass and balance
Product code	SLE/MAT/06
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Simple Beam Balance Used For?

Young learners first meet mass by asking "which is heavier?". With an object in each bucket, the lower side answers the question at a glance, and pupils can go on to order several objects from lightest to heaviest. Counting how many cubes or counters balance a pencil or a toy introduces the idea of measuring with units before standard weights are used.

Before each activity, slide the compensator until the empty beam rests level; this zero adjustment keeps comparisons fair. Stand the balance on a flat table away from draughts. Because the buckets lift off, loose materials such as sand, rice or beans can be emptied and the buckets washed after class. For a primary maths lab or a junior science lab, it is a practical first balance.

OEM Manufacturer

The Balance Simple Beam is produced by Jain Scientific Equipments Private Limited, which trades as ScienceLab, at its own licensed factory in Saha, Ambala, Haryana, India, where the company works as the original equipment manufacturer. Schools, dealers and importers are supplied factory-direct, and replacement buckets or repeat orders are handled by the maker itself — ask us about the parts you need. The ScienceLab profile has more about the company.
