Description :

Chemical Beaker (Bekera) 50ml (Product Code: SCI-137/041) is a small low-form borosilicate glass beaker used to hold, mix and gently warm small volumes of liquid in school and college chemistry practicals. With a 50 ml capacity and a graduated side, it lets each student run an individual test with only a little reagent, which keeps chemical use and waste down. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, as part of its borosilicate glassware range.

Specifications

Parameter	Detail
Capacity	50 ml
Material	Borosilicate glass
Colour	Transparent
Form	Low form
Markings	Graduated (scaled)
Chemical resistance	Chemical resistant
Heat resistance	Heat resistant
Product code	SCI-137/041
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 50 ml Beaker Used For?

A 50 ml beaker is the working vessel for small-scale chemistry: testing a few millilitres of a solution with an indicator, dissolving a small crystal sample, watching a precipitate form when two solutions meet, or holding a portion of reagent taken from a stock bottle so the bottle itself stays uncontaminated. Because it is low and wide, it sits steadily on the bench and is easy to reach into with a dropper or a glass rod.

The graduations give a quick estimate of volume; for exact amounts, measure the liquid in a measuring cylinder or pipette first and then transfer it. The borosilicate glass is heat resistant, so the beaker can be warmed gently on a wire gauze, but let it cool before picking it up because its small size leaves little room to grip away from hot glass. Small beakers like this are a staple of chemistry lab equipment for schools in India.

What to Specify When Ordering

- Capacity and code — this listing is the 50 ml beaker, SCI-137/041; other capacities are separate listings.
- Quantity — small beakers are usually counted per student or per bench, so give the
