Description :

Chemical Beaker (Bekera) 800 ml (Product Code: SCI-148/045) is a large, graduated low-form beaker of borosilicate glass used for bigger heating baths, dilutions and bulk mixing in school and college laboratories. The 800 ml size leaves generous space above a typical working volume, which helps when stirring vigorously or when a liquid may foam. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM scientific instruments manufacturer in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Capacity	800 ml
Glass	Borosilicate, transparent
Form	Low form
Graduations	Graduated (scaled)
Chemical resistance	Chemical resistant
Heat resistance	Heat resistant
Product code	SCI-148/045
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 800 ml Beaker Used For?

An 800 ml beaker is a comfortable choice for a water bath that must hold several boiling tubes or a small conical flask at once, and for dilutions in which a concentrated acid is added slowly to a larger volume of water with constant stirring. Biology classes use it to soak seeds, to set up potato-strip osmosis experiments in salt or sugar solutions, or to hold water that keeps specimens moist.

Because of its size, fill it at the bench rather than carrying it full across the room, and heat it on a well-supported tripod with gauze. The chemical-resistant borosilicate walls suit most classroom solutions; rinse the beaker promptly after use and dry it upside down on a rack. It is a useful size to keep alongside smaller beakers in any store of chemistry lab glassware.

OEM Manufacturer

Jain Scientific Equipments Private Limited operates under the ScienceLab name and is the original equipment manufacturer of the Chemical Beaker (Bekera) 800 ml. The company's own licensed factory at Saha, Ambala, Haryana, India, produces it, and ScienceLab ships factory-direct to schools, colleges, institutions and trade buyers. There is no middleman when you need extra beakers part-way through a session — simply ask us. More about the company is on the Scien
