Description :

T-Shaped Glass Pipes (Product Code: SCI-157/048) are glass tee connectors used to branch or combine gas and liquid lines in chemistry, physics and biology laboratory set-ups. Made from 7 mm diameter glass tube, each piece has a straight through-run with a side arm, and the glass is listed as both chemical resistant and heat resistant. They are manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and laboratory equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Shape	T-shaped (tee connector)
Material	Glass tube
Diameter	7 mm
Chemical resistance	Yes
Heat resistance	Yes
Product code	SCI-157/048
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are T-Shaped Glass Pipes Used For?

A tee lets one supply feed two outlets, for example bringing gas from a generator to two test tubes so that students can compare reactions side by side. It can also join two lines into one, or add a side branch fitted with rubber tubing and a pinch clamp that can be opened to release pressure or draw off a sample.

In physics set-ups, a T-piece is a simple way to connect a manometer into a line so that pressure can be read while air or gas flows. Push rubber tubing over each 7 mm arm with a twisting motion after wetting the glass, and support the joint so the side arm is never used as a lever. Small connectors like this are an easily overlooked but necessary part of chemistry lab glassware.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, a registered MSME manufacturer (Udyam UDYAM-HR-01-0003714) and the OEM of these T-shaped glass pipes. They are made at the company's own licensed factory at Saha, Ambala, Haryana, India, and export consignments are handled under Importer-Exporter Code AAECJ8618A (DGFT). Schools, colleges, dealers and importers therefore buy directly from the maker. Visit the ScienceLab company profile for more.
