Description :

Boiling Safety Pipes (Product Code: SCI-163/051) are blue laboratory safety pipes used as a precaution in boiling and heating set-ups at the chemistry bench in schools and colleges. Each pipe is 350 mm long with a 40 mm upper diameter; the listing does not state the material, so ask us to confirm it before ordering. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Colour	Blue
Upper diameter	40 mm
Length	350 mm
Material	Not stated in the listing — please ask us
Product code	SCI-163/051
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Boiling Safety Pipe Used For?

As the name indicates, these pipes are intended for boiling work, where a safety pipe forms part of the apparatus while liquids are heated. The listing gives the pipe's size but not how it is fitted, so tell us how you plan to use it, for example through a stopper or held in a clamp, and we will confirm that it suits your set-up.

Whatever the arrangement, basic boiling safety applies: never heat a completely closed vessel, clamp tall items firmly to a stand, keep the flame steady and moderate, wear safety goggles and let every part cool before dismantling. Pairing the pipe with dependable school chemistry lab equipment, such as a retort stand and a burner with an adjustable flame, keeps the set-up stable.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab, supplies the Boiling Safety Pipes from Ambala, Haryana, India, as part of its wider range of laboratory items for schools, colleges and institutions. Enquiries, quotations and dispatch within India and to international markets are handled by the ScienceLab team. See the ScienceLab company profile for more about the company.

Related Laboratory Equipment

Items that make a boiling set-up safer and steadier:

- Retort Stand — holds tall apparatus steady during heating.
- Bunsen Burner — an adjustable heat source for boiling.
- Rubber stoppers with holes of different diameters — for fitting pipes into flask necks.
