Product Name :

Marked (Taruar) Jars 250 ml

Product Code :

SCI-247/92

Image not found or type unknown

Description :

Marked (Taruar) Jars 250 ml (Product Code: SCI-247/92) is a graduated, clear borosilicateglass jar used to hold, portion out and carry liquids and small samples in school, college andteaching laboratories. Its 250 ml capacity suits a single bench or student group, and thecorrugated cap keeps the contents covered between steps. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, a scientific instruments manufacturer in India and OEMmaker of borosilicate laboratory glassware, at its own factory in Ambala.

Specifications

Parameter	Detail
Capacity	250 ml
Material	Borosilicate glass
Markings	Graduated
Colour	Clear
Closure	Corrugated cap
Properties	Heat resistant; chemical resistant
Product code	SCI-247/92
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Marked Jar 250 ml Used For?

A marked jar is handy whenever a class needs a ready portion of distilled water, a dilute solution or a sample prepared before the lesson. The graduations let students check roughly how much liquid is left at a glance, and the capped jar can be carried from the preparation room to the bench with less risk of spills.

For exact volumes, measure with a cylinder or pipette and use the jar to hold and dispense the liquid. Label every jar with its contents, close the cap after use and wash the borosilicate glass with warm water and a brush. These simple habits keep school chemistry lab equipment clean and ready for the next group.

What to Specify When Ordering

- The capacity: this listing is the 250 ml jar; larger marked pots are separate catalogue items.
- How many jars you need per bench, group or laboratory.
- Whether measuring cylinders or beakers should be quoted with the jars.
