Description :

Marked (Tarred) Pots (bottle) (Product Code: SCI-251/94) is a 1000 ml graduated bottle of clear borosilicate glass used to prepare, hold and dispense larger volumes of liquid for a whole laboratory class. Teachers and lab assistants use it for stock liquids that several student groups draw from, while the corrugated cap keeps the contents closed between sessions. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM lab glassware manufacturer inIndia, at its own factory in Ambala.

Specifications

Parameter	Detail
Capacity	1000 ml (1 litre)
Material	Borosilicate glass
Markings	Graduated
Colour	Clear
Closure	Corrugated cap
Properties	Heat resistant; chemical resistant
Product code	SCI-251/94
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 1000 ml Marked Bottle Used For?

In a busy teaching laboratory the litre-size marked bottle serves as the stock container: a teacher makes up a dilute solution, collects distilled water for rinsing, or keeps a prepared liquid for the day, and each group pours its share into smaller vessels. The graduations show how much remains, which helps the lab assistant decide when to prepare the next batch.

Place the bottle on a flat bench when filling and read the level at eye height. Carry it with one hand under the base, keep it capped when not in use and label it clearly. When diluting an acid, always add the acid slowly to water, never water to acid.

What to Specify When Ordering

- The capacity: this listing is the 1000 ml bottle; smaller marked jars and pots are separate catalogue items.
- How many stock bottles your laboratory needs, for example one per regularly used liquid.
- Any smaller jars or measuring cylinders to be quoted with it.
