Description :

Laboratory Security Rules (Product Code: SCI-383/158) is a laminated rules chart used to display the code of conduct students follow during practical work in school and college laboratories. At 70 cm x 100 cm it gives each rule room to be read from the benches, and teachers refer to it at the start of every practical session. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and laboratory instruments supplierin India, at its own factory in Ambala.

Specifications

Parameter	Detail
Subject	Laboratory security (conduct and safety) rules
Size	70 cm x 100 cm
Surface	Laminated
Mounting	Wall mounted
Setting	Classroom and laboratory
Product code	SCI-383/158
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Laboratory Rules Chart Used For?

Laboratory rules deal with behaviour rather than individual hazards: enter only when a teacher is present, keep bags off the benches, read the instructions before starting, use only the quantities given, never point a heated test tube at anyone, return apparatus clean and dry, put waste in the correct container and wash hands before leaving. With the rules on the wall, a teacher can simply point to the one being broken instead of repeating it.

A common approach is to have students read the chart at the start of the year and copy the rules into their practical notebooks. The chart is just as useful for laboratory assistants, visitors and younger classes using the room for the first time. Combined with a wall-mounted first-aid kit and eye protection, it sets the tone for safe, orderly practical work and is a basic item when planning laboratory equipment for a school.

OEM Manufacturer

As the OEM, Jain Scientific Equipments Private Limited — known by its trading name ScienceLab — manufactures the Laboratory Security Rules chart at its own licensed factory at Saha, Ambala, Haryana, India. The chart is supplied straight from the factory to schools, colleges, dealers and importers, and the manufacturer handles repeat orders itself when a school equips additional laboratories.
