Product Name :

Solubility of Chemicals in Water (chart)

Product Code :

SCI-395/164

Image not found or type unknown

Description :

Solubility of Chemicals in Water (chart) (Product Code: SCI-395/164) is a large laminated reference chart used to check whether a compound dissolves in water, in school and college chemistry laboratories. At 140 cm x 100 cm it can be read across the room, so students consult it from their benches before mixing solutions. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and laboratory equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Topic	Solubility of chemicals in water
Size	140 cm x 100 cm (large format)
Finish	Laminated
Mounting	Wall mounted
Intended setting	Classrooms and laboratories
Product code	SCI-395/164
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Water Solubility Chart Used For?

Solubility describes how much of a substance dissolves in a given amount of water at a set temperature. Students learn general patterns: nitrates and most sodium, potassium and ammonium compounds are soluble, while many carbonates, phosphates and hydroxides are not, and silver and lead chlorides are exceptions to the usual rule for chlorides. A solubility reference turns these patterns into something students can check rather than memorise.

The chart earns its place during salt preparation and qualitative salt analysis, when students must decide whether a product will stay in solution or come out as a solid. It also supports practicals on how temperature affects solubility and on growing crystals, making it a natural companion to a solubility experiment kit, test tubes and a glass stirring rod.

What to Specify When Ordering

- The product code SCI-395/164 — a separate listing, Solubility of Chemicals in Water, covers the same subject.
- The wall space available, since this chart is 140 cm x 100 cm.
- The number of copies for your laboratories and classrooms.
- Any language requirement for the chart text, so the artwork can be confirmed.
