Description :

Micropipette (Product Code: SLE/P/24) is a variable-volume hand pipette used to measure and transfer small liquid volumes from 5 to 50 µl in biology, biotechnology, microbiology and chemistry laboratories. It is lightweight, takes standard micropipette tips, has a tip ejector, and comes with a tool and instructions for self-calibration. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its range of lab equipment for research and teaching.

Specifications

Parameter	Detail
Type	Variable-volume micropipette
Volume range	5–50 µl
Tips	Standard micropipette tips
Tip removal	Tip ejector
Design	Lightweight; easy to use
Calibration	Tool and instructions included for self-calibration
Product code	SLE/P/24
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Micropipette Used For?

Micropipettes measure volumes far too small for glass pipettes or burettes. With a 5–50 µl range, this model suits loading samples into electrophoresis gel wells, preparing serial dilutions, adding enzymes or reagents to small reaction tubes and dispensing small aliquots in microbiology and biochemistry practicals.

Set the volume, press a fresh tip firmly onto the shaft, depress the plunger to the first stop, immerse the tip just below the liquid surface and release slowly. Dispense against the wall of the receiving vessel, then use the ejector to discard the tip without touching it. Keep the micropipette upright on a stand when not in use, never lay it down with liquid in the tip, and check its setting periodically with the supplied calibration tool and instructions.

What to Specify When Ordering

- Volume range: this model covers 5–50 µl; tell us if your work needs a different range.
- Tips: the quantity of standard micropipette tips to send with it.
- Number of micropipettes per bench or student group.
- Whether calibration documentation is needed, to be discussed with us before ordering.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies this micropipette from Ambala, Haryana, India. It is a sourced precision instrument, provided to schools, colleges, univ
