Description :

Periodic Table of Chemical Elements chart (Product Code: SCI-423/177) is a laminated wall chart of the periodic table used to teach element symbols, groups, periods and trends inchemistry classrooms and laboratories. Measuring 70 cm x 100 cm, it is a periodic table chart forschools in India and abroad that fits smaller rooms and laboratory walls where a very large posterwill not. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer,at its own factory in Ambala, India.

Specifications

Parameter	Detail
Topic	Periodic table of the chemical elements
Format	Wall-mounted chart
Size	70 cm x 100 cm
Finish	Laminated
Setting	Classrooms and laboratories
Product code	SCI-423/177
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Periodic Table Chart Used For?

Students look up symbols on the periodic table every time they write a formula or an equation. Teachers use the wall chart to show how an element's group predicts the charge of its ion and the formula of its compounds, to separate metals from non-metals, and to trace trends such as atomic size and reactivity down a group and across a period. It becomes the quickest way to answer a question in the middle of a lesson without opening a book.

Place the chart where it can be seen from both the teaching area and the practical benches, since students turn to it throughout the course. The laminated surface resists dust and can be wiped clean. As the listing does not describe the layout in detail, ask us for an image of the current print to check the table format and element information before ordering.

What to Specify When Ordering

- Wall space: this chart is 70 cm x 100 cm, so check it suits the wall where it will hang.
- Layout and labelling: confirm the table format you need against an image of the current print.
- Quantity: how many chemistry classrooms and laboratories need a copy.
- Product code SCI-423/177, so the chart is not confused with our other periodic table listings.
