## Description :

**Litmus Paper (Type Red)** (Product Code: SCI-617/269) is a pH indicator paper used to detect alkaline solutions and basic gases such as ammonia in school chemistry, biology and college practical classes. A base turns the red paper blue, while acids and neutral substances leave itred, and the product photograph shows this blue change on a strip dipped in a base. It is suppliedby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplierin India.

### Key Details

| Parameter | Detail |
|---|---|
| Indicator type | Red litmus paper |
| Response to bases | Turns blue |
| Response to acids | Stays red (no change) |
| Response to neutral substances | Stays red (no change) |
| Product image | Shows the blue colour change of a strip dipped in a base |
| Shelf life | Shelf life depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted. |
| Product code | SCI-617/269 |
| Supplied by | Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India |

### What Is Red Litmus Paper Used For?

Red litmus is the standard way to confirm that something is alkaline. Classes test soap solution, baking soda solution, lime water and dilute sodium hydroxide, and in the ammonium-ion test a damp red strip held over a warmed mixture of an ammonium salt and alkali turns blue as ammonia is given off.

Because acids and neutral liquids both leave it red, red litmus works as a pair with blue litmus: a sample that changes neither paper is neutral. Use a fresh strip for every sample, place a drop rather than dipping when the liquid is concentrated, and compare the result with an unused strip in daylight. Needing no preparation, it is a staple litmus paper for school labs in India and abroad.

### Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, which sources Litmus Paper (Type Red) and supplies it with its wider range of chemistry consumables to schools, colleges, laboratories and dealers. Combining red and blue litmus, indicators and reagents in one enquiry keeps ordering simple for a practical season. See the ScienceLab profile for more about the company.
